

Ali Noohi

Backend / Full-Stack Developer

Backend and Full-Stack Developer with experience building scalable applications across fintech, SaaS, and event platforms. Created and maintained OAuth/JWT-based authentication, resulting in 30% fewer auth-related errors. Led development of core app features supporting 10,000+ users. Holds a Master of Science degree in Software Engineering from Politecnico Di Torino.

WORK EXPERIENCE

Full Stack Developer - Remote

Apr 2025 – Present

Plusyar, Toronto,, Canada

- Developed core app features (event search, ticketing, profiles, real-time group chat) using **React Native/TypeScript**, Redux Toolkit, and Apollo Client, supporting **~10,000+ users** (est.)
- Implemented secure **OAuth/JWT authentication** flows (Google and Apple) with auto token refresh and defensive network logic, resulting in **~30% (est.) fewer authentication errors**
- Added offline data caching with **Redux Persist and Apollo Cache**, cutting server requests by **~50% and enabling seamless event browsing** and chat when offline
- Led** a team of 3 **Intern developers**, guided a code review process, and mentored on best practices, **improving code quality by 30%**

Full Stack Developer - Master's Thesis Project

Oct 2025 – Mar 2026

Politecnico Di Torino,Turin, Italy

- Architected a **full-stack analytics platform** for Railway OpenData, building end-to-end data pipelines and **interactive dashboards**
- Data processing time dropped by **30% through performance enhancements** and user-centric design
- Spearheaded the development of a new **CI/CD pipeline** using Jenkins and **Docker (Docker HUB)**, decreasing build times by **40%** and enabling **faster deployment** of new features to production

Backend Developer - Hybrid

Jul 2025 – Mar 2026

Bluebeetech, Turin, Italy

- Collaborated and maintained 2 core platforms: **menu&U**, a cloud-based restaurant SaaS, and **ISCC Tech**, a fintech CRM **supporting 5000+ users**
- Designed and expanded **RESTful APIs** and backend services using **Python Django**, reducing **API latency by 25%** through optimized architecture
- Restructured database performance and system scalability by improving **query efficiency and data models**, enhancing reliability and handling high-volume transactional and financial data

Backend Developer Intern (Remote)

Aug 2024 – Dec 2024

VSABT, Edinburgh, United Kingdom

- Innovated and maintained server-side logic for core projects using Laravel, PHP, and Vue.js, **reducing API response time by 15%**
- Increased **database performance** by identifying and resolving performance bottlenecks, implementing indexing strategies, and **improving query efficiency by 20%**

SKILLS

Programming Language:

Python, JavaScript, TypeScript, PHP, SQL, C++

Frameworks & Libraries:

Django, Laravel, Express.js, React, Next.js,Bootstrap, RESTful APIs, JWT,GraphQL

Dev-Ops:

Docker, Cloud Platform(GCP, AWS), Kubernetes, CI/CD, Nginx, Git Core

Databases :

Postgres, MySQL, MongoDB, Redis

Languages:

English (Fluent),
Persian (Native),
Italian (Elementary)
Dutch (Basic - Started to learn)

EDUCATION

Politecnico Di Torino

Master of Science
Major in Computer Engineering
Minor in Software Engineering
Turin, Italy – Mar 2026

Shahrekord University

Bachelor of Science
Major in Computer Engineering
Minor in Information Technology
Shahrekord, Iran – Sep 2021

Projects

EZelectronics,
Meme Game,
Kiruna Explorer,
Pac-Man Game with ARM ,
Cross-Modal-Perceptionist,
(Bachelor Defence Project)
